

meshO

meshO is a radio control solution for orienteering. **meshO** radios receive punches from controls and send them back to the event computers via a reliable, auto-routing, self healing, mesh radio network independent of cellular with no ongoing costs.

-  Provide commentary while competitors complete their course
-  Real-time tracking of who has started, finished, and their last punch for enhanced safety at all events
-  Integrates seamlessly with MeOS, SI Timing, OLynx and OE

Radio frequency	900 MHz
Range	Up to 3km
